**PPIS Deficiency Notice**

PM NUMBER: 32

REGISTRATION NUMBER: 87689-1

Transferred from: Senedu Alemu (Macfadden)

Date Processed: 11/20/2015

This jacket has been found to be deficient according to established EPA data processing guidelines for the following reasons:

1. Current accepted label dated \_\_\_\_/\_\_\_\_/\_\_\_\_  
\_\_\_\_ is missing from the jacket. \_\_\_\_ is missing acceptance stamp.  
\_\_\_\_ Acceptance stamp is missing date and/or registration number.  
\_\_\_\_ Is missing the following information: \_\_\_\_\_
2. Acceptance letter dated \_\_\_\_/\_\_\_\_/\_\_\_\_ and associated label are inconsistent concerning: \_\_\_\_ Acceptance date. \_\_\_\_ Product name. \_\_\_\_ Registration number.
3. Comments letter associated with label dated \_\_\_\_/\_\_\_\_/\_\_\_\_ is missing from the jacket.
4. Accepted (Basic / Alternate) CSF dated \_\_\_\_/\_\_\_\_/\_\_\_\_  
\_\_\_\_ Is missing from the jacket. \_\_\_\_ Is misfiled or has wrong registration number.  
\_\_\_\_ Sole active ingredient source product \_\_\_\_\_ - \_\_\_\_\_ has been cancelled.
5. \_\_\_\_ Active and inert chemical percentages do not equal 100%.

*ind. by clarify whether the*  
\_\_\_\_ Other information missing / inconsistent within the jacket. See below for details.

*Original product name mentioned on  
epa letter dated 11/18/2013 is acceptable.  
It does not match with the already  
acceptable product name in OPPIN. Though the  
epa letter (11/18/2013) mentions about a new  
alternate brand name, it does not mention  
about any change in the alternate product  
name.*

*Thankyou.*

# Material Sent for Data Extraction

Reg. # 87689-1

Description: Alternate Brand Name

☐ Material(s) Sent to Data Extraction Contractors:

☐ New Stamped Label Dated \_\_\_\_\_

☒ Notification Dated 08-30-13

☐ New CSF(s) Dated \_\_\_\_\_

☐ Other: \_\_\_\_\_

☒ Decision #: 483878

☐ Other Action/Comments: \_\_\_\_\_

File this coversheet and attached materials in the jacket. It must be well organized and clipped together, NOT STAPLED. Then give the jacket with the coversheet and materials to staff in the Information Services Center (ISC) (Room S-4900). If a jacket is full or only available as an image, please file materials in a new jacket and bring it down to the (ISC). For further information please call 703-605-0716.

Mr. Jeff Schmitt, President and Chief Executive Officer  
Global Chem Tech, LLC  
1968 West Acoma Boulevard  
Lake Havasu City, AZ 86403

NOV 18 2013

Subject: Notification of Alternate Brand Name  
**Shiner Chlorinating Tablets, 3" Tablets**  
EPA Registration Number: **87689-1**  
Application Date: August 30, 2013  
EPA Receipt Date: September 5, 2013

Dear Mr. Schmitt:

This acknowledges receipt of your Notification application, submitted under the provision of FIFRA 3(c)9.

Notification Purpose:

Global Chem Tech, LLC is submitting an Alternate Brand Name for **EPA Reg. No. 87689-1:**

**Swim-Chlor 3" Tablets**

General Comments:

Based on the review of the information submitted, the following comments apply.

The Notification is **Acceptable**.

A copy of the **accepted** Notification is attached in **Regulatory File Jacket 87689-1** for future reference.

If you have questions or comments with regard to this Agency Letter, please contact Killian Swift by email at [Swift.Killian@epa.gov](mailto:Swift.Killian@epa.gov) or by telephone at 703-308-6346. When you are submitting information or data in response to this Agency Letter, please send a copy of this Agency Letter with your response in order to facilitate processing.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'D. Fuller', with a long horizontal stroke extending to the right.

Demson Fuller,  
Acting EPA Product Manager 32  
Regulatory Management Branch II  
Antimicrobials Division 7510P

### FIRST AID

**IF IN EYES** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF INHALED** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

**IF ON SKIN OR CLOTHING** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

### HOT LINE NUMBER

Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. You may also contact 1-800-255-3926 for emergency treatment information.

### NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.

### PRECAUTIONARY STATEMENTS

#### DANGER

#### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CORROSIVE:** Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist, or use the toilet. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS STATEMENT:** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product directly into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS:** STRONG OXIDIZING AGENT. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 37°F (125°C) with liberation of harmful gases. When ignited, will burn with the evolution of chlorine

and equally toxic gases.

Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible fire and explosion.

**IN CASE OF FIRE OR FLOOD:** Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. Do not use ABC or other dry chemical extinguishers since there is the potential for violent reaction.

**IN CASE OF CONTAMINATION OR DECOMPOSITION:** Do not seal container. Neutralize material to a non-oxidizing state for safe disposal.

### SWIMMING POOL SANITIZER FOR AUTOMATIC CHLORINATORS AND FLOATERS

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

**BEFORE APPLYING PRODUCT:** First, ensure all swimming pool equipment is working properly, then clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6. Then add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Next, superchlorinate the swimming pool water to 1 to 4 ppm chlorine residual. When using other products as outlined in directions for this product, always follow directions on those products.

**WHEN USED IN AUTOMATIC CHLORINATORS AND FLOATERS:** This product can be used in a feeding device such as automatic chlorinators and floaters as a maintenance treatment to provide a source of chlorine residual. Fill unit with this product and adjust the feeding device to assure a constant treatment level of 1-4 ppm available chlorine in the swimming pool water. Generally 1 to 2 ounces of this product per 10,000 gallons will be needed daily. Use a test kit or test strip to monitor chlorine levels and adjust the chlorine feed device as needed. Check and refill chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

First, add one 200 gram Shiner chlorinating tablet per 10,000 gallons of water. Next, on the following day, test the chlorine residual using test strips or a test kit. If the residual is less than 1 ppm, add 1 to 3 additional tablets and/or increase the number of hours the pump operates each day. Adjust the amount of product by 1 to 3 tablets added and the hours pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine due to risk of body injury.

### SWIMMING POOL SANITIZER FOR SKIMMER APPLICATION

When used as directed, this product is an effective stabilized chlorinating product for sanitizing water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

**BEFORE APPLYING PRODUCT:** First, ensure all swimming pool equipment is working properly, then clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6. Then add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Next, superchlorinate the swimming pool water to 1 to 4 ppm chlorine residual. When using other products as outlined in directions for this product, always follow directions on those products.

**WHEN USED IN SKIMMERS:** SPECIAL NOTE: This product may be used in plastic skimmers only (skimmer and the piping between skimmer and pump are plastic). Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result. Do not turn pump off for more than 8 hours in vinyl swimming pools when this product is in the pool.

First, add one 200 gram Shiner chlorinating tablet per 10,000 gallons of water. Next, on the following day, test the chlorine residual using test strips or a test kit. If the residual is less than 1 ppm, add 1 to 3 additional tablets and/or increase the number of hours the pump operates each day. Adjust the amount of product by 1 to 3 tablets added and the hours pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

**STORAGE AND DISPOSAL:** Do not contaminate water, food or feed by storage and disposal.

**STORAGE:** Keep material dry and in a dry area. Store in original container, where temperature do not exceed 125°F (52°C) for 24 hours. Retile polyethylene liner after each use and keep container tightly closed.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or sludge is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Registrant: Global Chem Tech LLC  
Shiner Warehouse LLC  
1968 W. Acoma Blvd  
Lake Havasu City, Az. 86403

Subject: EPA Reg No. 87689-1, 87689-2 and 87689-3. Certification statement child resistant packing "CPR".

"I certify that the packaging used for this product meets with the standards of 40 CFR 157.32, including the revised standards in 16 CFR 170.15 (b), when tested by the revised testing procedures in 16 CFR 1700.20 as published in 60FR 37710 ( July 21, 1995)".

Jeff Schmitt, President

There are two packages for our products. 1gl to 2gl 65mm wall pails and 3gl to 6gl are 90mm walls. Pails are from B-Way. Patented, round containers are UN-certified and constructed of high-density polyethylene. The polypropylene Squeeze-Lock CRC closure which is a re-closable. Pails open by pushing the tab and twisting the cover. Unique closure system passes child-resistant and senior-friendly protocols with an optional tamper-evident feature.

An ASTM type 1-D 3.5 to 6.5gl tapered inside wall, plastic, open head pan, with a plastic, continuously threaded pail lid. The lid contains a lever closure. The Package is opened by holding down the lever on the pail lid while unscrewing the lid counter clockwise and lifting it off the pail. When closed the lever fits into a groove on the inside of the pail neck so the lid cannot be unscrewed. The M&M LIFELATCH closure is used. Both pail and closure is a matched unit from M&M industries.

Please feel free to contact me for any additional info at [globalchemtech1@gmail.com](mailto:globalchemtech1@gmail.com) or 928-505-4747. Thank you for your assistance.

Best Regards  
Jeff Schmitt

RE: CRP Certification dated February 21, 2011  
Product Name: Shiner Chlorinating Tablets  
EPA Registration Number: 87689-1

Dear Mr. Kutcel:

The Agency has received the Certification with Respect to Child Resistant Packaging (CRP) certification you have submitted in accordance with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Your certification statement and the information provided for the M&M Industries Inc. Life Latch containers has been reviewed and found to be acceptable. A copy of our review of your submission is enclosed.

If you have any questions concerning this letter, please contact Tom Luminello by telephone, (703) 308-8075, or by e-mail at [luminello.tom@epa.gov](mailto:luminello.tom@epa.gov).

Sincerely,

A handwritten signature in black ink, appearing to read "Wanda Y. Henson", is written over the typed name.

EPA File No.: 87689-1/ Shiner Chlorinating Tablets

Subject: Certifications to Compliance with Child Resistant Packaging Regulations Per PR-Notice 96-2

Dear Mr. Kennedy,

The Office of Pesticide Programs/Antimicrobials Division has reviewed your certification regarding Child-Resistant Packaging and Compliance with the standards of 40 CFR 157.32 including the revised effectiveness standards in 16 CFR 1700.15(b), and the revised testing procedures in 16 CFR 1700.20 as published in 60 FR 37710 (July 21, 1995). Your certifications did include a statement describing the type of packaging used and its designation using the American Society for Testing and Materials (ASTM) Standard D3475-95 "Standard Classification of Child-Resistant Packages". Your certification is acceptable.

The container types listed were:

— M&M Industries, Inc. Life Latch: In the following pail sizes.

Pail Size (gallons)	Net Product Weight (pounds)
D.6	5
1.25	10
1.25	15
3.5	20
3.5	25
5.0	35
5.0	40
6.5	50

12/28/2010 01:28 PM

Hi Tom,

I'm sorry, I may have been confused. Our initial label included a single tablet "size" or net weight. The revised label I sent you excludes that net weight because we do not have Child Resistant wrappers designed for a single tablet size.

When we decide to offer a single tablet size, we will apply to have the label revised to add a single tablet size at that time.

Sorry for the confusion.

Chad Kennedy

Thanks Chad and Kevin

The CRP certification may or may be approved. For now, I will assume the CRP is acceptable.

I have to get someone else to review and accept.

Are the 3 inch tablets wrapped in Child Resistant wrappers?

Hi Tom,

Our 3" tablets are not individually wrapped, which is why we are using the CRP certified pails and lids.

Thanks, Chad

History: This message has been replied to.

---

Dear Mr. Luminello,

Kevin Kutcel is traveling, so he asked me to send you this email directly in response to your required changes to the Shiner Chlorinating Tablets label and request for CRP information.

Please find the attached revised label as well as CRP information provided to us by M & M Industries Inc., the pail and lid manufacturer. Also, attached is a letter from Shiner Warehouse stating the pail sizes and lid sizes we are proposing to use for each net product size.

We are aware of the deadline to respond to you with this information. Please let both Kevin and me know if there is anything more you need so we can respond quickly.

Thank you,

Chad Kennedy  
Shiner Warehouse LLC

Chad,

Unfortunately, the last e-mail you sent me regarding the revised label did not have the necessary attachments. I am traveling the next two days with my family returning home and will not have immediate e-mail access. I do not want to be the cause of you missing your deadline with the EPA, so please send the revised label, letter and certificates directly to Tom at the EPA. His e-mail address is: Luminello.Tom@epamail.epa.gov

Please be sure to cc me on the e-mail.

Thank you,

Kevin Kutcel

## SHINER WAREHOUSE LLC

December 24, 2010

Tom Luminello, PM Team 32 (7510-P)  
US Environmental Protection Agency,  
Antimicrobials Division @ Potomac Yard South  
1200 Pennsylvania Ave. N.W.  
Washington D.C. 20460

Subject: Shiner Chlorinating Tablets  
Company Number: 87689

Dear Mr. Luminello,

We propose the following CRP certified containers for our Shiner Chlorinating Tablets for net product weight of 50 lbs or lower intended for retail use:

Manufacturer: M & M Industries Inc.  
CRP Name: Life Latch  
Pail Sizes and corresponding net product weight:

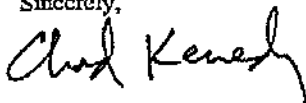

Pail Size	Net Product Weight
0.6 gallon	5 lbs
1.25 gallon	10 lbs
1.25 gallon	15 lbs
3.5 gallon	20 lbs
3.5 gallon	25 lbs
5.0 gallon	35 lbs
5.0 gallon	40 lbs
6.5 gallon	50 lbs

We obtained information from the EPA's website - CRP Manufacturer Index which lists M & M Industries Inc. Life Latch product. We also requested Child Safety Study information from the manufacturer, please see the attached studies.

According to the manufacturer, M & M manufactures 3 lid sizes. The CT Test for the 5.0 gallon New Generation style lid also encompasses the 3.5 gallon and 6.5 gallon New Generation sizes. The lid is the same for all three size pails, it is interchangeable, the manufacturer does not make a separate lid for all three. Therefore, M & M Industries Inc. provided us with 3 Child Safety Studies for the 0.6 gallon, 1.25 gallon, and the 3.5 - 6.5 gallon pails and lids.

Thank you for your cooperation.

Sincerely,

Chad Kennedy  
Shiner Warehouse LLC  
Manager

## **5 GALLON LIFE LATCH-NEW GENERATION**

**Mini Senior Adult Test  
Mini Sequential Child Test  
CPSC 16 CFR PART 1700.20**

## MINI EVALUATION REPORT

Study Conducted For: M and M Industries Inc.  
316 Corporate Place  
Chattanooga, TN 37419

Packaging Studied: 5 Gallon Life Latch-New Generation

Sample Preparation: Pails were filled with weight and the lids were properly secured prior to testing. Pails were opened and closed one time prior to testing with children

Type of Study: Mini Senior Adult Test (24 Adults)  
Mini Sequential Child Test (24 Children)

Date Study Completed: April 28, 2010

Testing Procedures: Using established procedures, 24 adults, ages 50 to 70 years and 24 children, ages 42 to 51 months, were tested according to the Consumer Product Safety Commission's protocol. (16 CFR Part 1700.20, July 21, 1995)

Definition of a Failure: Access to product is defined as removal of lid from the pail.

Final Test Results:

<u>Senior Adult:</u>	
1 <sup>st</sup> Five Minute Test	100%
2 <sup>nd</sup> One Minute Test	96%
<u>Sequential Child:</u>	
Before Demonstration	92%
Accumulative	88%

Summary: Twenty-four adults were tested according to the CPSC protocol to determine if they could open the package; 96% were able to do so. Twenty-four children were also tested according to the CPSC protocol to determine if they could open the package; 88% failed to do so. In order to meet the complete guidelines of the CPSC protocol, further testing would be needed.

Respectfully submitted,

Michael S. Buie  
CEO

Kevin R. Kutcel, Agent for  
Shiner Warehouse LLC  
512 West 2<sup>nd</sup> Ave. Suite 101  
Mesa, AZ. 85210

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product (OPP Decision No. 439591) is conditionally registered in accordance with FIFRA sec 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and, submit acceptable responses required for re-registration of your product under FIFRA section 4.
2. Change EPA File Symbol 87689-R to EPA Registration Number 87689-1.
3. Delete the word "professionals" from marketing language on page 4.
4. In all directions for use change all instances of the word "devise" or "devises" to "device" or "devices".
5. Under Swimming Pool Sanitizer and Swimming Pool Sanitizer for Skimmer Application change the "disinfecting" claim to "sanitizing".
6. Under Winter Swimming Pool Treatment revise the phrase "...of effective disinfecting agent..." to "...of chlorine..."
7. Correct the spelling of "read" on page 6.
8. Under Directions for Use on page 6 correct the spelling of "should".
9. Your certification with respect to Child Resistant Packaging (CRP) was not submitted with the application. The information since provided is subject to Agency confirmation.

Submit one copy of the finished final printed label prior to releasing this product for sale.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e).

Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the conditionally approved label is enclosed for your records.

**PRECAUTIONARY STATEMENTS**  
**DANGER**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles, face shield or safety glasses, and chemical resistant gloves. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS STATEMENT**

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product directly into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT**

Strong oxidizing agent. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 437°F (225°C) with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases.

Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible fire and explosion.

**IN CASE OF FIRE OR SMOKE:** Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. Do not use ABC or other dry chemical extinguishers since there is the potential for violent reaction.

**IN CASE OF CONTAMINATION OR DECOMPOSITION:** Do not reseal container. Neutralize material to a non-oxidizing state for safe disposal.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage and disposal.

**STORAGE:** Keep material dry and in a dry area. Store in original container, where temperatures do not exceed 125°F (52°C) for 24 hours. Retie polyethylene liner after each use and keep container tightly closed.

**PESTICIDE DISPOSAL:** Pesticide Wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

### SWIMMING POOL SANITIZER

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

#### BEFORE APPLYING PRODUCT:

First, ensure all swimming pool equipment is working properly, then clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6. Then add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Next, superchlorinate the swimming pool water to 1 to 4 ppm chlorine residual. When using other products as outlined in directions for this product, always follow directions on those products.

#### WHEN USED IN AUTOMATIC CHLORINATORS AND FLOATERS:

*device* This product can be used in feeding devices such as automatic chlorinators and floaters as a maintenance treatment to provide a source of chlorine residual. Fill unit with this product and adjust the feeding device to assure a constant treatment level of 1-4 ppm available chlorine in the swimming pool water. Generally 1 to 2 ounces of this product *device* per 10,000 gallons will be needed daily. Use a test kit or test strips to monitor chlorine levels and adjust the chlorine feed device as needed. Check and refill chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

4 of  
341

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for large tablets}*

*device*

#### WHEN USED IN SKIMMERS:

**SPECIAL NOTE:** This product may be used in plastic skimmers only if skimmer and the piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result. Do not turn pump off for more than 8 hours in vinyl swimming pools when this product is in skimmer.

First, add one 200 gram Shiner Chlorinating Tablet per 10,000 gallons of water. Next, on the following day, test the chlorine residual using test strips or a test kit. If the residual is less than 1 ppm, add additional product and/or increase the number of hours the pump operates each day. Adjust the amount of product added and the hours of pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

## SWIMMING POOL SANITIZER FOR SKIMMER APPLICATION

Sanitizer

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

#### BEFORE APPLYING PRODUCT:

First, ensure all swimming pool equipment is working properly, then clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6. Then add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Next, superchlorinate the swimming pool water to 1 to 4 ppm chlorine residual. When using other products as outlined in directions for this product, always follow directions on those products.

#### WHEN USED IN SKIMMERS:

**SPECIAL NOTE:** This product may be used in plastic skimmers only if skimmer and the piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result. Do not turn pump off for more than 8 hours in vinyl swimming pools when this product is in skimmer.

First, add one 200 gram Shiner Chlorinating Tablet 10,000 gallons of water. Next, on the following day, test the chlorine residual using test strips or a test kit. If the residual is less than 1 ppm, add 1 to 3 additional tablets and/or increase the number of hours the pump operates each day. Adjust the amount of product by 1 to 3 tablets added and the hours of pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for winter floater}*

## WINTER SWIMMING POOL TREATMENT

of chlorine

When used as directed, this product provides a source of effective disinfecting agent for winterized swimming pools. Do not allow swimming in swimming pool while this product is in use.

### DIRECTIONS FOR USE

It is a violation of federal law to use this product in any manner inconsistent with its label. Read entire label and use strictly in accordance with precautionary statements and directions.

THIS PRODUCT IS FOR USE IN WHITE PLASTER SWIMMING POOLS ONLY AND SHOULD BE USED AS A SUPPLEMENTAL SOURCE OF SANITIZER ONLY FOR WINTERIZATION PURPOSES.

Before using this product the swimming pool water should be properly balanced and appropriately treated with winterizing products appropriate for your geographic area.

After winterization procedures are complete, place this product into the center of the swimming pool in the deep end of the swimming pool. The bag containing the chlorinating tablets will hang below the surface and be kept afloat. Use one 200 gram Shiner Chlorinating Tablet for each 10,000 gallons of swimming pool water. This product may be used with mesh or with solid covers.

Hi Tom,

I'm sorry, I may have been confused. Our initial label included a single tablet "size" or net weight. The revised label I sent you excludes that net weight because we do not have Child Resistant wrappers designed for a single tablet size.

When we decide to offer a single tablet size, we will apply to have the label revised to add a single tablet size at that time.

Sorry for the confusion.

Chad Kennedy

Thanks Chad and Kevin

The CRP certification may or may be approved. For now, I will assume the CRP is acceptable.

I have to get someone else to review and accept.

Are the 3 inch tablets wrapped in Child Resistant wrappers?

Dear Mr. Luminello,

Kevin Kutcel is traveling, so he asked me to send you this email directly in response to your required changes to the Shiner Chlorinating Tablets label and request for CRP information.

Please find the attached revised label as well as CRP information provided to us by M & M Industries Inc., the pail and lid manufacturer. Also, attached is a letter from Shiner Warehouse stating the pail sizes and lid sizes we are proposing to use for each net product size.

We are aware of the deadline to respond to you with this information. Please let both Kevin and me know if there is anything more you need so we can respond quickly.

Thank you,

Chad Kennedy  
Shiner Warehouse LLC

Chad,

Unfortunately, the last e-mail you sent me regarding the revised label did not have the necessary attachments. I am traveling the next two days with my family returning home and will not have immediate e-mail access. I do not want to be the cause of you missing your deadline with the EPA, so please send the revised label, letter and certificates directly to Tom at the EPA. His e-mail address is: Luminello.Tom@epamail.epa.gov

Please be sure to cc me on the e-mail.

Thank you,

Kevin Kutcel

Hi Tom,

Our 3" tablets are not individually wrapped, which is why we are using the CRP certified pails and lids.

Thanks, Chad

## SHINER WAREHOUSE LLC

December 24, 2010

Tom Luminello, PM Team 32 (7510-P)  
US Environmental Protection Agency,  
Antimicrobials Division @ Potomac Yard South  
1200 Pennsylvania Ave. N.W.  
Washington D.C. 20460

Subject: Shiner Chlorinating Tablets  
Company Number 87689

Dear Mr. Luminello,

We propose the following CRP certified containers for our Shiner Chlorinating Tablets for net product weight of 50 lbs or lower intended for retail use:

Manufacturer: M & M Industries Inc.  
CRP Name: Life Latch  
Pail Sizes and corresponding net product weight:

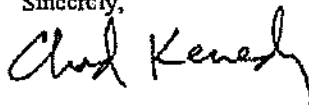

Pail Size	Net Product Weight
0.6 gallon	5 lbs
1.25 gallon	10 lbs
1.25 gallon	15 lbs
3.5 gallon	20 lbs
3.5 gallon	25 lbs
5.0 gallon	35 lbs
5.0 gallon	40 lbs
6.5 gallon	50 lbs

We obtained information from the EPA's website -- CRP Manufacturer Index which lists M & M Industries Inc. Life Latch product. We also requested Child Safety Study information from the manufacturer, please see the attached studies.

According to the manufacturer, M & M manufactures 3 lid sizes. The CT Test for the 5.0 gallon New Generation style lid also encompasses the 3.5 gallon and 6.5 gallon New Generation sizes. The lid is the same for all three size pails, it is interchangeable, the manufacturer does not make a separate lid for all three. Therefore, M & M Industries Inc. provided us with 3 Child Safety Studies for the 0.6 gallon, 1.25 gallon, and the 3.5 – 6.5 gallon pails and lids.

Thank you for your cooperation.

Sincerely,

Chad Kennedy  
Shiner Warehouse LLC  
Manager

## **5 GALLON LIFE LATCH-NEW GENERATION**

**Mini Senior Adult Test  
Mini Sequential Child Test

## MINI EVALUATION REPORT

Study Conducted For: M and M Industries Inc.  
316 Corporate Place  
Chattanooga, TN 37419

Packaging Studied: 5 Gallon Life Latch-New Generation

Sample Preparation: Pails were filled with weight and the lids were properly secured prior to testing. Pails were opened and closed one time prior to testing with children

Type of Study: Mini Senior Adult Test (24 Adults)  
Mini Sequential Child Test (24 Children)

Date Study Completed: April 28, 2010

Testing Procedures: Using established procedures, 24 adults, ages 50 to 70 years and 24 children, ages 42 to 51 months, were tested according to the Consumer Product Safety Commission's protocol. (16 CFR Part 1700.20, July 21, 1995)

Definition of a Failure: Access to product is defined as removal of lid from the pail.

Final Test Results:

<u>Senior Adult:</u>	
1 <sup>st</sup> Five Minute Test	100%
2 <sup>nd</sup> One Minute Test	96%
<u>Sequential Child:</u>	
Before Demonstration	92%
Accumulative	88%

Summary: Twenty-four adults were tested according to the CPSC protocol to determine if they could open the package; 96% were able to do so. Twenty-four children were also tested according to the CPSC protocol to determine if they could open the package; 88% failed to do so. In order to meet the complete guidelines of the CPSC protocol, further testing would be needed.

Respectfully submitted,

Michael S. Buie

Shiner Warehouse LLC

67 South Higley Road, Suite 103-209

Gilbert, Arizona 85296

**PRECAUTIONARY STATEMENT**  
**DANGER**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles, face shield or safety glasses, and chemical resistant gloves. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS STATEMENT**

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product directly into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT**

Strong oxidizing agent. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 437°F (225°C) with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases.

Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible fire and explosion.

**IN CASE OF FIRE OR SMOKE:** Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. Do not use ABC or other dry chemical extinguishers since there is the potential for violent reaction.

**IN CASE OF CONTAMINATION OR DECOMPOSITION:** Do not reseal container. Neutralize material to a non-oxidizing state for safe disposal.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage and disposal.

**STORAGE:** Keep material dry and in a dry area. Store in original container, where temperatures do not exceed 125°F (52°C) for 24 hours. Retie polyethylene liner after each use and keep container tightly closed.

**PESTICIDE DISPOSAL:** Pesticide Wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

## CONTAINER HANDLING:

*{for use with plastic containers}*

### [NON-REFILLABLE CONTAINER:

Plastic Container: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by incineration or if allowed by State and local authorities, by burning. If burned, stay out of smoke.]

*{for use with winter floaters}*

### [WINTER TREATMENT CONTAINER:

Winter floater:

WEAR GOGGLES AND RUBBER GLOVES WHEN REMOVING CARTRIDGES FROM THE SWIMMING POOL.

When the swimming pool is opened in the spring, empty floater should be drained and disposed of by placing into trash collection. If any undissolved product remains in the floater at the time of swimming pool opening, remove the floater from the swimming pool and drain off any water inside the bag area into the swimming pool. Open the bag and remove the solid product from the bag. Place the product into an empty swimming pool skimmer basket. Operate the circulation system of the swimming pool at least 12 hours per day until the product has completely dissolved. DO NOT PLACE THIS PRODUCT INTO A SKIMMER WHERE OTHER PRODUCTS ARE PRESENT. DO NOT PLACE OTHER PRODUCTS INTO A SKIMMER WHERE THIS PRODUCT IS PRESENT. Dispose of the floatation material and plastic bag by placing into trash collection.

**NOTE: THE FLOATATION MATERIAL CONTAINED IN THIS PRODUCT ALONG WITH THE PLASTIC BAG SHOULD BE DISPOSED OF BY PLACING THEM INTO TRASH COLLECTION.]**

### SWIMMING POOL SANITIZER

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

#### BEFORE APPLYING PRODUCT:

First, ensure all swimming pool equipment is working properly, then clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6. Then add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Next, superchlorinate the swimming pool water to 1 to 4 ppm chlorine residual. When using other products as outlined in directions for this product, always follow directions on those products.

#### WHEN USED IN AUTOMATIC CHLORINATORS AND FLOATERS:

This product can be used in feeding devices such as automatic chlorinators and floaters as a maintenance treatment to provide a source of chlorine residual. Fill unit with this product and adjust the feeding device to assure a constant treatment level of 1-4 ppm available chlorine in the swimming pool water. Generally 1 to 2 ounces of this product per 10,000 gallons will be needed daily. Use a test kit or test strips to monitor chlorine levels and adjust the chlorine feed device as needed. Check and refill chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for large tablets}*

### SWIMMING POOL SANITIZER

Check and refill chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

#### WHEN USED IN SKIMMERS:

**SPECIAL NOTE:** This product may be used in plastic skimmers only if skimmer and the piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result. Do not turn pump off for more than 8 hours in vinyl swimming pools when this product is in skimmer.

First, add one of this product per 10,000 gallons of water. Next, on the following day, test the chlorine residual using test strips or a test kit. If the residual is less than 1 ppm, add additional product and/or increase the number of hours the pump operates each day. Adjust the amount of product added and the hours of pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

*one what? provide a weight / or # of tablets*

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

If the residual is less than 1 ppm, add additional product and/or increase the number of hours the pump operates each day. Adjust the amount of product added and the hours of pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for winter floater}*

## WINTER SWIMMING POOL TREATMENT

When used as directed, this product provides a source of effective disinfecting agent for winterized swimming pools. Do not allow swimming in swimming pool while this product is in use.

## DIRECTIONS FOR USE

It is a violation of federal law to use this product in any manner inconsistent with its label. Read entire label and use strictly in accordance with precautionary statements and directions.

**THIS PRODUCT IS FOR USE IN WHITE PLASTER SWIMMING POOLS ONLY AND SHOULD BE USED AS A SUPPLEMENTAL SOURCE OF SANITIZER ONLY FOR WINTERIZATION PURPOSES.**

Before using this product the swimming pool water should be properly balanced and appropriately treated with winterizing products appropriate for your geographic area.

After winterization procedures are complete, place this product into the center of the swimming pool in the deep end of the swimming pool. The bag containing the chlorinating sticks will hang below the surface and be kept afloat. Use one of this product for each 10,000 gallons of swimming pool water. This product may be used with mesh or with solid covers.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

Dear Tom,

Please find attached my response to the two deficiencies you found regarding Reg. No. 87689-R. I apologize for the delay, but it took a couple of weeks to receive the requested certificate for the child resistant packaging. The packaging is the "5-gallon Life Latch" pail manufactured by M and M Industries Inc. This pail is also on the US EPA website as an approved package.

<http://www.epa.gov/opprd001/crp/indexcrpmfg.htm>

Also attached is a revised data matrices (8570-35) which covers the end use data requirement as required by the label. Please do not hesitate to call me at 440-263-7305 if you have any questions.

## MINI EVALUATION REPORT

Study Conducted For: M and M Industries Inc.  
316 Corporate Place  
Chattanooga, TN 37419

Packaging Studied: 5 Gallon Life Latch-New Generation

Sample Preparation: Pails were filled with weight and the lids were properly secured prior to testing. Pails were opened and closed one time prior to testing with children

Type of Study: Mini Senior Adult Test (24 Adults)  
Mini Sequential Child Test (24 Children)

Date Study Completed: April 28, 2010

Testing Procedures: Using established procedures, 24 adults, ages 50 to 70 years and 24 children, ages 42 to 51 months, were tested according to the Consumer Product Safety Commission's protocol. (16 CFR Part 1700.20, July 21, 1995)

Definition of a Failure: Access to product is defined as removal of lid from the pail.

Final Test Results:

<u>Senior Adult:</u>	
1 <sup>st</sup> Five Minute Test	100%
2 <sup>nd</sup> One Minute Test	96%
<u>Sequential Child:</u>	
Before Demonstration	92%
Accumulative	88%

Summary: Twenty-four adults were tested according to the CPSC protocol to determine if they could open the package; 96% were able to do so. Twenty-four children were also tested according to the CPSC protocol to determine if they could open the package; 88% failed to do so. In order to meet the complete guidelines of the CPSC protocol, further testing would be needed.

Respectfully submitted,

US EPA (REGFEE)  
Office of Pesticide Programs  
Room S-4900, One Potomac Yard  
2777 South Crystal Drive  
Arlington, VA 22202-4501

Subject: New "Me-Too" Registration for Shiner Chlorinating Tablets (EPA No. 87689-)

Please accept the completed application for a new registration for the product, "Shiner Chlorinating Tablets", that contains the active ingredient, Trichloro-s-triazinetriene. This application is a 100% repack of the product, [REDACTED]

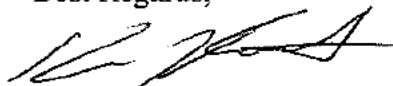

[REDACTED] Because it is a 100% repack, the form "Certification with Respect to Citation of Data (Form 8570-34)" is not included in this packet.

Within this packet, the following information is included:

1. Receipt for a payment of \$394.00. This payment was based on the code, "A531" and reflects the small business waiver reduction of 75%. Also attached is the completed application for the small business waiver along with supporting documentation. Please note that PureShield was only incorporated on June 24, 2010. The company has no employees and zero sales to date.
2. Letter of authorization allowing KRK Consulting LLC to represent Shiner Warehouse in all matters related to the U.S. EPA.
3. Application for the "Me-Too" Registration for "Shiner Chlorinating Tablets" that includes:
  - a. 5 copies of proposed EPA Label with CD that contains pdf and doc files of proposed label.
  - b. Form 8570-1 Application Form
  - c. Form 8570-27 Formulator's Exemption
  - d. Form 8570-4 Confidential Statement of Formula
  - e. Form 8570-35 Data Matrix
  - f. Letter of Authorization from [REDACTED] granting Shiner Warehouse permission to cite their studies on file with EPA in support of proposed registration.

Your cooperation in processing this application in an expedient manner is greatly appreciated. Please call me at 440-263-7305 if you should have any questions.

Best Regards,

Kevin R. Kutcel,

Consultant for Shiner Warehouse Inc.

TU 9/16/10

\* N/A – Not Applicable

**Footnotes**

A. During the 21 day initial content review, all CSFs will be reviewed to determine whether all inerts listed, including fragrances, are approved for the proposed uses. If an unapproved inert is identified, the applicant must either 1) resolve the inert issue by, for example, removing the inert, substituting it with an approved inert, submitting documentation that EPA approved the inert for the proposed pesticidal uses, correcting mistakes on the CSF, etc. or 2) provide the data to support OPP approval of the inert or 3) withdraw the application. Removing or substituting an inert ingredient will require a new CSF and may require submission of data. All information, forms, data and documentation resolving the inert issue must have been received by the Agency or the application withdrawn within the 21 day period. otherwise, the Agency will reject the application as described below.

To successfully complete this aspect of the 21 day initial content screen, applicants are **strongly encouraged** to verify that all inert ingredients have been approved for the application's uses even if a product is **currently** registered by consulting the inert Web

site [link to <http://www.epa.gov/oppr001/inerts/lists.html>] and if the inert is not approved, to **obtain the necessary inert approval prior to submitting an application to register a pesticide product containing that inert ingredient**. Some inert ingredients are no longer approved for food uses or certain types of uses. The name and/or CAS number on a CSF must match the name and CAS number on this web site. Simple typographical errors in the name or CAS number have resulted in processing delays.

If an inert is not listed on the inert ingredient web site and the applicant believes that the inert has been approved, the applicant should contact the Inert Ingredient Assessment Branch (IIAB) at [inertsbranch@epa.gov](mailto:inertsbranch@epa.gov) and resolve the issue. Copies of the correspondence with IIAB resolving the issue should accompany the application. All new inerts except PIP inerts are reviewed by IIAB. The IIAB should also be contacted for any questions on what supporting data needs to be submitted for and the Agency's inert review process. Questions on PIP inerts should be directed to the Chief of Microbial Pesticides Branch [Link to [http://www.epa.gov/oppbppd1/biopesticides/contacts\\_bppd.htm](http://www.epa.gov/oppbppd1/biopesticides/contacts_bppd.htm)].

When a brand, trade, or proprietary name of an inert ingredient is listed on a CSF, additional information such as an alternate name of the inert, CAS number or other information [link to <http://www.epa.gov/oppr001/inerts/tips.pdf>] must also be included to enable the Agency to determine if it has been approved. Each component of an inert mixture (including a fragrance) must be identified. In some cases, the supplier of the mixture or fragrance may need to provide this information to the Agency. Prior to the Agency's receipt of an application, applicants must arrange with a proprietary mixture or fragrance supplier to provide the component information to the Agency or promptly upon EPA's request. If the inert ingredients in a proprietary blend (including fragrances) cannot or are not identified or provided within the 21-day content review period, the Agency will reject the application.

During the 21 day content review, applicants should submit information to the individual identified by the Agency when the applicant is informed of an unapproved inert.

#### **Unapproved Inerts Identified on CSFs**

##### **All applications except conventional new products and PIPs**

Once an unapproved inert is identified on a CSF, the Agency will contact the applicant with the following options:

1. Correct the application by, for instance, correcting the inert's identity or CAS number, providing documentation that the inert has been approved, or removing the unapproved inert from the CSF or replacing it with one that is approved for the application's uses; or
2. Submit the information and data needed for the Agency to approve the unapproved inert. If this option is selected and implemented, the Agency may request an extension in the PRIA decision review timeframe to accommodate the inert review/approval process;

3. Withdraw the application (the Agency retains 25% of the full fee for the fee category estimated); or

If none of these options is selected and implemented by the applicant within the 21 day content review period, the Agency will reject the application and retain 25% of the full fee of the category identified.

#### Conventional New Product Applications

When the Registration Division identifies an unapproved inert on a CSF with an application for a new product that the applicant has not identified as requiring an inert approval (R311, R312 or R313), it will contact the applicant with the following options:

1. Correct the application by, for instance, correcting the inert's identity or CAS number, providing documentation that the inert has been approved, or removing the unapproved inert from the CSF or replacing it with one that is approved for the application's uses; or
2. Submit the information and data needed for the Agency to approve the unapproved inert, including any required petition to establish or amend a tolerance or exemption from a tolerance. (This option may change the PRIA category for the application, which could require a longer decision review time and a larger fee. If additional fees are due, they must be received by the Agency within the 21 day content review period.)
3. Withdraw the application (the Agency retains 25% of the full fee for the fee category estimated); or

If none of the above options is selected and implemented during the 21-day content-review period, the Agency will reject the application and retain 25% of the appropriate fee for the new product-inert approval category.

#### PIP Applications

When the Biopesticide and Pollution Prevention Division identifies an unapproved inert on a PIP CSF and a request to approve the inert does not accompany the application, it will contact the applicant with the following options:

1. Correct the application by, for instance, correcting the spelling or name of the inert to that in 40 CFR 174, or providing documentation that the inert has been approved; or
2. Submit the information and data needed for the Agency to approve the unapproved inert. If an inert ingredient tolerance exemption petition is required, the petition must be received by the Agency and the B903 fee paid within the 21 day period. If this option is selected and implemented, the Agency will discuss harmonizing the timeframe for both actions.

3. Withdraw the application (the Agency retains 25% of the full fee for the fee category estimated); or

If none of the above options is selected and implemented during the 21 day content review period, the Agency will reject the application and retain 25% of the fee.

B. A policy on documentation of offers to pay is still being developed, however, for a me-too or fast track (similar/identical) new product, R300 or A530, an application without the necessary authorizations of offers to pay will be placed into either R301 or A531. The Agency recommends that authorizations of offers to pay be submitted with other PRIA applications to avoid delays in the Agency's decision.

C. Biopesticide applicants are advised to contact the Agency and discuss study waivers prior to submitting their application to the Agency. Documentation of such discussions should be submitted with the study waiver.

SUBJECT: Receipt of Application and 75% Small Business Waiver Request

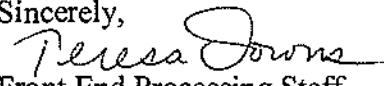

Dear Registrant:

The Office of Pesticide Programs has received your application, 75% small business waiver request, and certification of payment. If you submitted data with this application, the results of the PRN-86-5 screen will be communicated separately. During the administrative screen, the Office of Pesticide Programs has determined that this Action is subject to a Pesticide Registration Service Fee as defined in the Pesticide Registration Improvement Act.

The Action has been identified as Action Code: A530  
ME-TOO;NEW PRODUCT;FAST TRACK;

Your request for waiver has been forwarded for review. You will be notified in writing when a determination is made regarding your request. If your waiver request is approved, the decision review time period will start on the date of approval and we will process a refund of your \$119 overpayment as soon as is practicable. If your waiver request is denied, you will receive an invoice for the outstanding balance.

If you have any questions, please contact the Pesticide Registration Service Fee Ombudsman at (703) 308-6427.

Sincerely,  
  
Teresa Downs

**Formulator's Exemption Statement**  
(40 CFR 152.85)

Applicant's Name and Address  Shiner Warehouse 67 South Higley Road, Suite 103-209 Gilbert, AZ 85926	EPA File Symbol/Registration Number 87689-
	Product Name Shiner Chlorinating Tablets
	Date of Confidential Statement of Formula (EPA Form 8570-4) 09/01/2010

As an authorized representative of the applicant for registration of the product identified above, I certify that:

(1) This product contains the following active ingredient(s):

Trichloro-s-triazinetriene

(2) Of these, each active ingredient listed in paragraph (4) is present solely as the result of the use of that active ingredient in the manufacturing, formulation or repackaging another product which contains that active ingredient which is registered under FIFRA Section 3, is purchased by us from another person and meets the requirements of 40 CFR section 158.50(e)(2) or (3).

(3) Indicate by checking (A) or (B) below which paragraph applies:

☒ (A) An accurate Confidential Statement of Formula (EPA FORM 8570-4) for the above identified product is attached to this statement. That formula statement indicates, by company name, registration number, and product name, the source of the active ingredient(s) listed in paragraph (1).

OR

☐ (B) The Confidential Statement of Formula (CSF)(EPA Form 8570-4) referenced above and on file with the EPA is complete, current, an accurate and contains the information required on the current CSF.

(4) The following active ingredients in this product qualify for the formulator's exemption.

Source		
Active Ingredient	Product Name	Registration Number
Trichloro-s-triazinetriene	[REDACTED]	[REDACTED]
Signature 	Name and Title Kevin R. Kutcel / Consultant	Date 09/01/2010

{All text in brackets [xxx] is optional and may or may not be included on a final label.}  
{All text in braces {xxx} is administrative and will not appear on a final label.}

## KEEP OUT OF REACH OF CHILDREN DANGER

FIRST AID	
IF IN EYES	<ul style="list-style-type: none"><li>▪ Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.</li><li>▪ Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li><li>▪ Call a poison control center or doctor for treatment advice.</li></ul>
IF SWALLOWED	<ul style="list-style-type: none"><li>▪ Call a poison control center or doctor immediately for treatment advice.</li><li>▪ Have person sip a glass of water if able to swallow.</li><li>▪ Do not induce vomiting unless told to do so by the poison control center or doctor.</li><li>▪ Do not give anything by mouth to an unconscious person</li></ul>
IF INHALED	<ul style="list-style-type: none"><li>▪ Move person to fresh air.</li><li>▪ If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.</li><li>▪ Call a poison control center or doctor for further treatment advice.</li></ul>
IF ON SKIN OR CLOTHING	<ul style="list-style-type: none"><li>▪ Take off contaminated clothing.</li><li>▪ Rinse skin immediately with plenty of water for 15-20 minutes.</li><li>▪ Call a poison control center or doctor for treatment advice.</li></ul>
HOT LINE NUMBER	
Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. You may also contact 1-800-255-3924 for emergency treatment information.	
NOTE TO PHYSICIAN	
Probable mucosal damage may contraindicate for the use of gastric lavage.	

Manufactured by:  
Shiner Warehouse LLC  
67 South Higley Road, Suite 103-209  
Gilbert, Arizona 85296

**PRECAUTIONARY STATEMENTS**  
**DANGER**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles, face shield or safety glasses, and chemical resistant gloves. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS STATEMENT**

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product directly into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT**

Strong oxidizing agent. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 437°F (225°C) with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases.

Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible fire and explosion.

**IN CASE OF FIRE OR SMOKE:** Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. Do not use ABC or other dry chemical extinguishers since there is the potential for violent reaction.

**IN CASE OF CONTAMINATION OR DECOMPOSITION:** Do not reseal container. Neutralize material to a non-oxidizing state for safe disposal.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage and disposal.

**STORAGE:** Keep material dry and in a dry area. Store in original container, where temperatures do not exceed 125°F (52°C) for 24 hours. Retie polyethylene liner after each use and keep container tightly closed.

**PESTICIDE DISPOSAL:** Pesticide Wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

### **SWIMMING POOL SANITIZER**

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

### **DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

#### **BEFORE APPLYING PRODUCT:**

First, ensure all swimming pool equipment is working properly, then clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6. Then add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Next, superchlorinate the swimming pool water to 1 to 4 ppm chlorine residual. When using other products as outlined in directions for this product, always follow directions on those products.

#### **WHEN USED IN AUTOMATIC CHLORINATORS AND FLOATERS:**

This product can be used in a feeding device such as automatic chlorinators and floaters as a maintenance treatment to provide a source of chlorine residual. Fill unit with this product and adjust the feeding device to assure a constant treatment level of 1-4 ppm available chlorine in the swimming pool water. Generally 1 to 2 ounces of this product per 10,000 gallons will be needed daily. Use a test kit or test strips to monitor chlorine levels and adjust the chlorine feed device as needed. Check and refill chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for large tablets}*

### **SWIMMING POOL SANITIZER**

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

Generally 1 to 2 ounces of this product per 10,000 gallons will be needed daily. Use a test kit or test strips to monitor chlorine levels and adjust the chlorine feed device as needed. Check and refill chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

#### **WHEN USED IN SKIMMERS:**

**SPECIAL NOTE:** This product may be used in plastic skimmers only if skimmer and the piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result. Do not turn pump off for more than 8 hours in vinyl swimming pools when this product is in skimmer.

First, add one of this product per 10,000 gallons of water. Next, on the following day, test the chlorine residual using test strips or a test kit. If the residual is less than 1 ppm, add additional product and/or increase the number of hours the pump operates each day. Adjust the amount of product added and the hours of pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for large tablets for skimmer application}*

### **SWIMMING POOL SANITIZER FOR SKIMMER APPLICATION**

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

## **DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Adjust the amount of product added and the hours of pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for winter floater}*

## **WINTER SWIMMING POOL TREATMENT**

When used as directed, this product provides a source of effective disinfecting agent for winterized swimming pools. Do not allow swimming in swimming pool while this product is in use.

## **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in any manner inconsistent with its label. Read entire label and use strictly in accordance with precautionary statements and directions.

**THIS PRODUCT IS FOR USE IN WHITE PLASTER SWIMMING POOLS ONLY AND SHOULD BE USED AS A SUPPLEMENTAL SOURCE OF SANITIZER ONLY FOR WINTERIZATION PURPOSES.**

Before using this product the swimming pool water should be properly balanced and appropriately treated with winterizing products appropriate for your geographic area.

After winterization procedures are complete, place this product into the center of the swimming pool in the deep end of the swimming pool. The bag containing the chlorinating sticks will hang below the surface and be kept afloat. Use one of this product for each 10,000 gallons of swimming pool water. This product may be used with mesh or with solid covers.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

IF ON SKIN OR CLOTHING	<ul style="list-style-type: none"><li>▪ Take off contaminated clothing.</li><li>▪ Rinse skin immediately with plenty of water for 15-20 minutes.</li><li>▪ Call a poison control center or doctor for treatment advice.</li></ul>
HOT LINE NUMBER	
Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. You may also contact 1-800-255-3924 for emergency treatment information.	
NOTE TO PHYSICIAN	
Probable mucosal damage may contraindicate for the use of gastric lavage.	

Manufactured by:  
Shiner Warehouse LLC  
67 South Higley Road, Suite 103-209  
Gilbert, Arizona 85296

**PRECAUTIONARY STATEMENTS**  
**DANGER**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles, face shield or safety glasses, and chemical resistant gloves. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS STATEMENT**

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product directly into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT**

Strong oxidizing agent. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 437°F (225°C) with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases.

Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible fire and explosion.

**IN CASE OF FIRE OR SMOKE:** Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. Do not use ABC or other dry chemical extinguishers since there is the potential for violent reaction.

**IN CASE OF CONTAMINATION OR DECOMPOSITION:** Do not reseal container. Neutralize material to a non-oxidizing state for safe disposal.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage and disposal.

**STORAGE:** Keep material dry and in a dry area. Store in original container, where temperatures do not exceed 125°F (52°C) for 24 hours. Retie polyethylene liner after each use and keep container tightly closed.

**PESTICIDE DISPOSAL:** Pesticide Wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

If any undissolved product remains in the floater at the time of swimming pool opening, remove the floater from the swimming pool and drain off any water inside the bag area into the swimming pool. Open the bag and remove the solid product from the bag. Place the product into an empty swimming pool skimmer basket. Operate the circulation system of the swimming pool at least 12 hours per day until the product has completely dissolved. **DO NOT PLACE THIS PRODUCT INTO A SKIMMER WHERE OTHER PRODUCTS ARE PRESENT. DO NOT PLACE OTHER PRODUCTS INTO A SKIMMER WHERE THIS PRODUCT IS PRESENT.** Dispose of the floatation material and plastic bag by placing into trash collection.

**NOTE: THE FLOATATION MATERIAL CONTAINED IN THIS PRODUCT ALONG WITH THE PLASTIC BAG SHOULD BE DISPOSED OF BY PLACING THEM INTO TRASH COLLECTION.]**

### **SWIMMING POOL SANITIZER**

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

### **DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

#### **BEFORE APPLYING PRODUCT:**

First, ensure all swimming pool equipment is working properly, then clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6. Then add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Next, superchlorinate the swimming pool water to 1 to 4 ppm chlorine residual. When using other products as outlined in directions for this product, always follow directions on those products.

#### **WHEN USED IN AUTOMATIC CHLORINATORS AND FLOATERS:**

This product can be used in feeding devices such as automatic chlorinators and floaters as a maintenance treatment to provide a source of chlorine residual. Fill unit with this product and adjust the feeding device to assure a constant treatment level of 1-4 ppm available chlorine in the swimming pool water. Generally 1 to 2 ounces of this product per 10,000 gallons will be needed daily. Use a test kit or test strips to monitor chlorine levels and adjust the chlorine feed device as needed. Check and refill chlorinator as needed. Do not let this product come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

#### **WHEN USED IN SKIMMERS:**

**SPECIAL NOTE:** This product may be used in plastic skimmers only if skimmer and the piping between skimmer and pump are plastic. Do not add other chemicals through the skimmer when using this product in skimmer as an explosion or fire may result. Do not turn pump off for more than 8 hours in vinyl swimming pools when this product is in skimmer.

First, add one of this product per 10,000 gallons of water. Next, on the following day, test the chlorine residual using test strips or a test kit. If the residual is less than 1 ppm, add additional product and/or increase the number of hours the pump operates each day. Adjust the amount of product added and the hours of pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for large tablets for skimmer application}*

### **SWIMMING POOL SANITIZER FOR SKIMMER APPLICATION**

When used as directed, this product is an effective stabilized chlorinating product for disinfecting water in swimming pools. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and micro-organisms in your swimming pool.

### **DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

#### **BEFORE APPLYING PRODUCT:**

Adjust the amount of product added and the hours of pump operation to maintain a chlorine residual of 1 to 4 ppm. Replenish the product as necessary to maintain chlorine residual of 1 to 4 ppm.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

*{Directions to be used for winter floater}*

### **WINTER SWIMMING POOL TREATMENT**

When used as directed, this product provides a source of effective disinfecting agent for winterized swimming pools. Do not allow swimming in swimming pool while this product is in use.

### **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in any manner inconsistent with its label. Read entire label and use strictly in accordance with precautionary statements and directions.

**THIS PRODUCT IS FOR USE IN WHITE PLASTER SWIMMING POOLS ONLY AND SHOULD BE USED AS A SUPPLEMENTAL SOURCE OF SANITIZER ONLY FOR WINTERIZATION PURPOSES.**

Before using this product the swimming pool water should be properly balanced and appropriately treated with winterizing products appropriate for your geographic area.

After winterization procedures are complete, place this product into the center of the swimming pool in the deep end of the swimming pool. The bag containing the chlorinating sticks will hang below the surface and be kept afloat. Use one of this product for each 10,000 gallons of swimming pool water. This product may be used with mesh or with solid covers.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.
